

# 2022 Nanospace Engineering Seminar

## Functional carbon materials: new synthesis approaches and analysis method

**Professor Hirotomoto Nishihara**

Institute of Multidisciplinary Research for Advanced Materials  
Tohoku University

**Date and Time: August 18, Thursday  
15:00–16:00**

**Room: AICS communication room 412**

Professor H. Nishihara is one of active scientists on carbon materials. He has been challenging to establish a new science on novel carbon-based materials.

You could find out attractive hints for your research in his presentation.

**Inquiries: Professor Katsumi Kaneko
